want a
career in
IT?

Why Information Technology?

Plug into your IT career with Tec-NQ.

Our dedicated IT program incorporates academic training to achieve a Queensland Certificate of Education (QCE), training delivered by an industry professional and work experience.

Why Tec-NQ?

The results speak for themselves.

In 2015 Tec-NQ organised over 8,000 days of work experience for our students, 96% of Year 12 students achieved the Queensland Certificate of Education (QCE), and we secured apprenticeships for 39% of qualifying students.

Tec-NQ is different. Our unique program delivers trade training and education five days a week. Our trainers are sourced directly from industry and we have an engaged network for over 600 employers.

In December 2015 Tec-NQ opened a Boarding Facility on Bowen Road to accommodate out-of-town students.

Information Technology @ Tec-NQ

After participating in this dynamic two year program, you'll walk away with:

- Hands-on experience in programming to be able to code in at least 4 mainstream business languages (C#, Javascript, php and SQL) and be able to integrate user interfaces with online databases
- Create a business application
- Hands-on experience in systems administration - get to manage a small network and configure a small business server
- Solid understanding and practical experience of business data (including GIS) and how to prepare it for business decision making
- Hands on experience in building PCs and troubleshooting hardware issues
- Learn to train users
- Real experience meeting with real business owners and analysing IT requirements and implementing real business solutions

This program will ensure Tec-NQ IT students are skilled in the basics and with a solid platform to develop their skills in the area of their interest in this diverse industry.

The Tec-NQ difference

You

You are more than just a number at Tec-NQ. As a smaller organisation we deliver faster, more flexible outcomes.

Real-world learning

The best way to learn is with tools, not a mouse. Our classes are facilitator led, hands on and face-to-face.

Industry current facilitators

Sourced directly from industry, our facilitators know the expectations and conditions of today's workplace.

Industry exposure

A dedicated team of Industry Relationship Managers ensure you are best placed to secure an apprenticeship.

Modern facilities and equipment

Built in 2007, our modern facilities and equipment are constantly updated to ensure your learning is up-to-date with industry.
