LOW VOLTAGE RESCUE AND CPR

COURSE INFORMATION

Successful completion of this course enables participants working within the electrical industry to act as a safety observer. It provides participants with the skills to manage an electrical accident and perform low voltage panel rescue in accordance with the Electrical Safety Regulation 2013.

This course provides training and assessment in the following units of competency:

HLTAID001	Provide cardiopulmonary resuscitation
UETTDRRF06B	Perform rescue from a live panel

COURSE OUTCOME

Upon successful completion of this course participants will receive a Statement of Attainment in UETTDRRF06B - Perform rescue from a live panel and HLTAID001 - Provide cardiopulmonary resuscitation. Revalidation of UETTDRRF06B and HLTAID001 is required every 12 months for persons working in the electrical industry as per the Electrical Safety Regulations 2013.

ENTRY REQUIREMENTS

There are no entry requirements for this course.

COURSE PREREQUISITES

There are no prerequisites for this course.

COURSE OUTLINE

This course requires the participant to safely identify electrical hazards, assess the area for danger, remove a person connected to the low voltage electrical supply, and carry out first aid measures and CPR if required.

It also includes identifying other hazards and risks, and reporting them to the supervisor via an incident report.

COURSE TOPICS

- DRSABCD Action Plan
- Managing the unconscious, breathing casualty
- Cardiopulmonary Resuscitation (CPR)
- Choking
- Legal requirements and obligations
- Infection control
- Defibrillation awareness
- Introduction to low voltage principles
- Rescue from low voltage apparatus
- Hazards and risk management

COURSE COST

PAYMENT	\$75
